

Job Title: Senior Systems Consultant
Department: Professional Services
Skills: CCA, CCEA, MCSE, Active Directory, Exchange
Salary: 50,000 to 60,000

Position Summary:

Are you looking for a job with a dynamic growing company where YOU can directly impact its growth and future direction as well as your future success? Do you want to work for a company that appreciates your talent and considers you a valuable resource that will be trained, encouraged to maintain and obtain certifications, sent to conferences, and work with leading edge technologies? Would you like the freedom to work flexible hours and telecommute to work? Moose Logic is a progressive technology company focusing on Citrix remote access solutions, managed services for small and medium sized business, and advanced network design and implementation utilizing Microsoft server technologies.

The Senior Systems Consultant position is responsible for applying consulting services methodologies and providing leadership in the installation, configuration, and implementation of Microsoft and Citrix products. The position requires the ability to execute projects independently, supervise a project team, or lead a small project. A Senior Consultant assumes responsibility for the team's completion of deliverables and is held accountable for the team's success. The Senior Consultant is expected to mentor junior consultants on methodology, best practices, technology, and general consulting skills. Strong problem solving and analytical abilities are required for the position. Strong written and verbal communication skills are required.

Primary Accountabilities: A Senior Consultant works on complex problems and addresses broad design issues that impact the implementation success of projects. The individual exercises independent judgment in developing methods, techniques, and evaluation criterion for obtaining results. This individual is responsible and accountable for the work output of a consulting team and the effective delegation of work to more junior consultants.

The primary duties for this position include but are not limited to:

- Serve as a project lead.
- Act as the primary senior technology advisor with the client.
- Collaborate with a Moose Logic sales professional to determine a client's business need and recommend an appropriate solution to meet that need.
- Act as a Microsoft and Citrix product and technology expert.
- Effectively execute Moose Logic service offerings and communicate their value.
- Participate in business development activities.
- Identifies additional opportunities with current clients.
- Assume responsibility/accountability for project deliverables.
- Understand the project "big picture" and the impact of different areas on the whole project.
- Mentor junior consultants on proper methodology, best practices, technology, and general consulting skills.
- Flexibly meet varying levels of expertise depending on the job.
- Proactively seek to expand knowledge and supplement skills through appropriate use of books, manuals, and other self-study and point of need training

Qualifications: The Senior Consultant must have 7+ years of demonstrated technical problem solving experience as well as strong communication and documentation skills. This position requires detailed knowledge and hands on experience with Citrix XenApp/XenDesktop technology. The individual in this position must be self-starting, flexible, dependable, capable of multi-tasking, and possess the ability to quickly learn new products and technologies. The successful candidate for this position will possess an advanced understanding of Microsoft Windows operating systems for servers and desktops as well as proficiency with common office productivity software such as Microsoft Office. Additionally an advanced knowledge of networking technologies in several of the following areas is required:

- Active Directory implementation

- Windows server setup and configuration
- Understanding of DNS, WINS, DHCP, IIS and other complementary Microsoft server technologies
- Network Security
- Routing
- Firewall configuration
- Networking
- TCP/IP
- Scripting

Requirements:

Bachelor of Science or equivalent experience and knowledge of network design and system architecture is desired. CCEA and MCSE are preferred. The successful applicant must have a positive customer service attitude and be willing to travel as required.

Aggressive compensation and benefits DOE.

Moose Logic is an Equal Opportunity Employer.
