Submit Your Questions: Select “Questions” to type your question(s). Your question will be read to the audience and addressed during the Q&A section of this webinar.

Weekly Q&A with Moose Logic

Secure Access for Citrix XenApp

Presented by Garry Corbin
June 16, 2010

Agenda

- Introduction: 5 - 10 minutes
 - Citrix secure access solutions – what are they?
 - Access Gateway VPX
 - Changes to licensing
 - SmartAccess
- Q&A: 15 - 20 minutes
 - Submit your typed questions within the Questions section.
 - Questions requiring more research will be answered by email AND within the attachment to this webinar's archive

Citrix Secure Access Solutions

- Citrix Secure Gateway
- Citrix Access Gateway

<u>Model</u>	<u>Editions</u>	<u>Total Users</u>
– VPX	Standard, Advanced	Up to 500 CCU
– 2010	Standard, Advanced	Up to 500 CCU
– MPX 5500	Enterprise	Up to 5,000 CCU
– 9010 FIPS	Enterprise	Up to 5,000 CCU

- MPX 5500 and 9010 FIPS support HA

Access Gateway VPX

- Virtual appliance
- Runs on Citrix XenServer including Free Edition
- Less expensive to maintain than Secure Gateway
- \$995.00 MSRP (US) per virtual instance

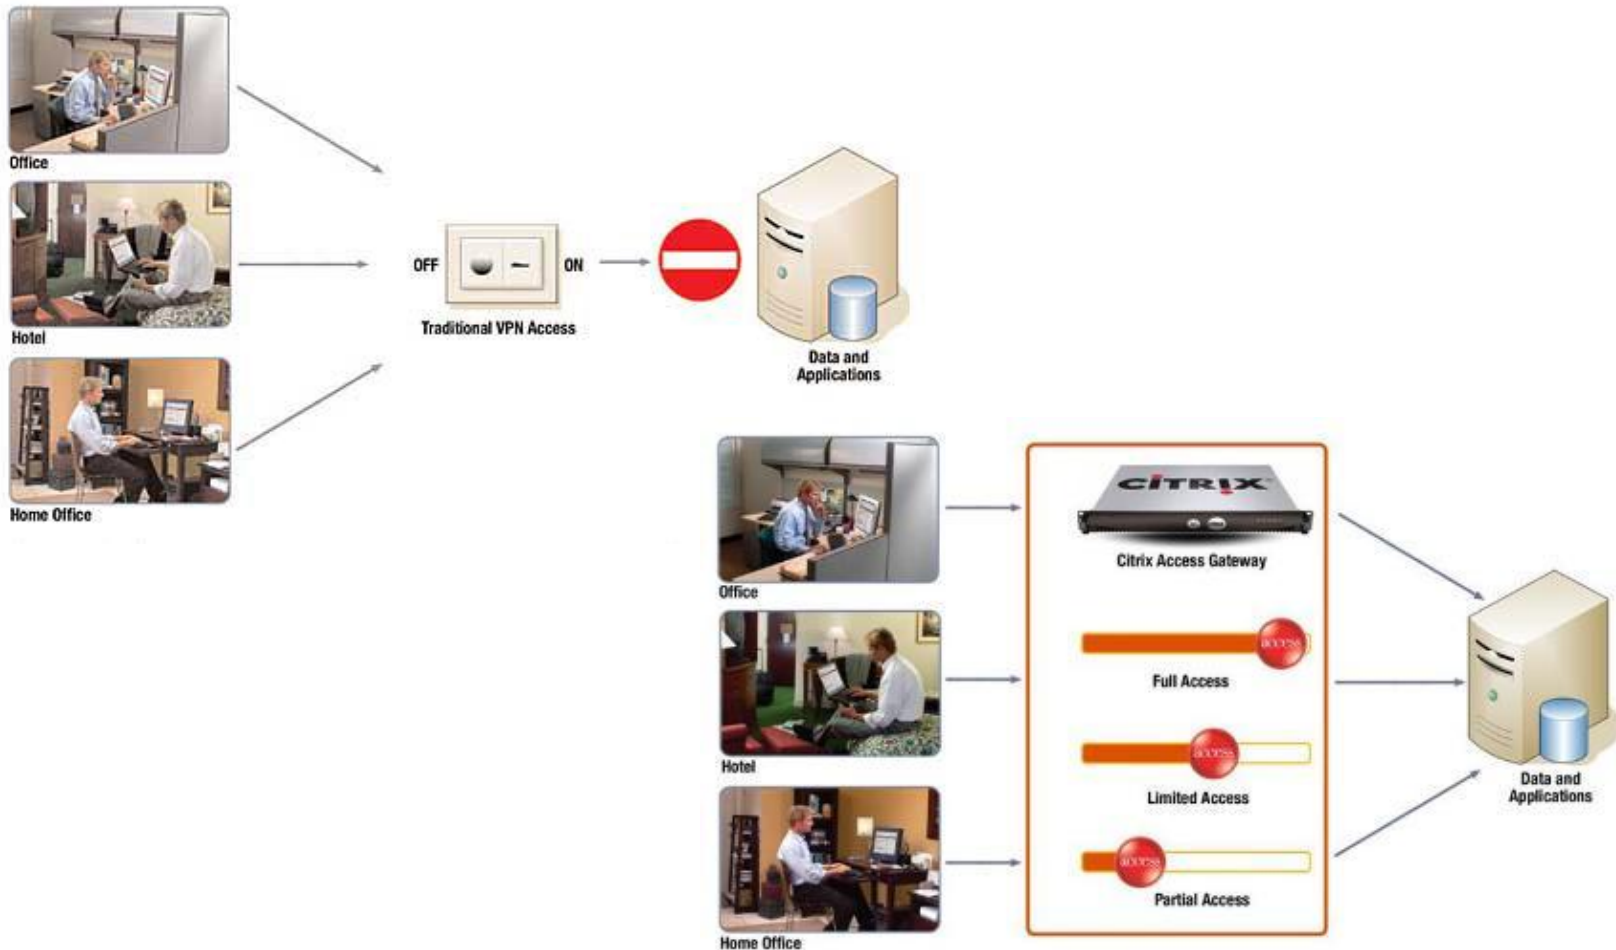

Access Gateway Platform Licenses

- **Basic** (up to the maximum capacity of the appliance)
 - Strong authentication
 - Integration with Citrix Web Interface to broker connections to XenApp or XenDesktop
 - Secure SSL relay of ICA session traffic to online (hosted) applications and desktops
 - Compatibility with Citrix Receiver (hosted applications only)
- Connection features that require an Access Gateway Universal concurrent user license include:
 - Full network-layer VPN tunneling
 - Access to XenApp offline (streamed) applications
 - Endpoint Analysis
 - “SmartAccess” adaptive policies, published application and virtual channel filtering
 - Clientless access to e-mail, web sites and file shares

SmartAccess

- Ensure corporate security while providing user access
- Understand and determine trust level of the access device
- Granularly control access rights to resources
- Control the actions available to users once access is granted
- Achieve granular control without overburdening IT staff
- Avoid the complexity and limitations of device remediation

Granular Secure Remote Access Control
